

Splice Cap ® Product Description

The Splice Cap is a Patented specialty product designed for the post-tension construction industry. When used in conjunction with either HDPE or PVC pipe, it functions as a durable means of providing a mechanical seal for post-tension splice couplers.

Features and Benefits

The Splice Cap offers the following features:

- We offer the Splice Cap for use with either 1.5" pipe or 2" pipe.
- SPC-001 Splice Cap - 1.5": Can be used with any 1.5" PVC pipe (schedule 40 or 20), or 1.5" DR 11 HDPE pipe.
- SPC-002 Splice Cap – 2.0": Can be used with any 2" PVC pipe (schedule 40 or 20), or 2" DR 17 HDPE pipe.
- Will fit over all known cable sheathing materials.
- The Polypropylene construction makes for a tough and durable part that will stand up to the rigors of the work environment.

Applications

When used in conjunction with either HDPE or PVC pipe, and ½" post-tension cable sheathing, it functions as one component in the encasement of ½" post-tension splice couplers.

Typical Properties

Plastic Material Type	LDPE
Construction Method	Injection Molded

Health and Safety

Based on available information, this product is not expected to produce adverse effects on health when used for the intended application. This product should not be used for purposes other than its intended use. If disposing of used product, take care to protect the environment.
